

SIGNIFICANCE OF YIELD IN BOND MARKET

SIGNIFICANCE OF YIELD IN BOND MARKET

When equity markets are bullish we say “ the Sensex has “gone up” or “Equity prices have “gone up”

BUT

When bond markets are bullish we say “yields” have “gone down”

Why??

SIGNIFICANCE OF YIELD IN BOND MARKET

When bond markets move up, we say that “yields” have gone down whereas when bond markets fall we say the “yields” have gone up

Thus there seems to be an inverse relationship between the markets and the “yields”

SIGNIFICANCE OF YIELD IN BOND MARKET

HOWEVER

It is quite the opposite with Equity Markets where the “SENSEX” is said to go up with rising markets and go down with falling markets

THUS

There seems to be a direct relationship between the equity markets and the SENSEX

SIGNIFICANCE OF YIELD IN BOND MARKET

In equity markets a business offers its shares to investors who are willing to take a risk on the business succeeding and thereby making big gains.

SIGNIFICANCE OF YIELD IN BOND MARKET

In a bond market the business raises debt capital where the investors invest money for a fixed period at a particular rate of interest.

SIGNIFICANCE OF YIELD IN BOND MARKET

When the bond markets are bullish (positive) it means there are many investors who are willing to lend money.

In such a situation the business can expect to raise capital at a lower interest rate or “lower yield”

Hence we say that “when bond markets are bullish the yields fall”.

SIGNIFICANCE OF YIELD IN BOND MARKET

Let me explain with an example.
Let's say I issue a debt paper of
Rs. 100 each at 10% interest
p.a.

This means that an investor
who lends me Rs 100 for one
year will earn Rs 10 at the end
of the year. Thus at the end of
the year I will return
Rs. 110 (Rs 100 + Rs 10)

SIGNIFICANCE OF YIELD IN BOND MARKET

In a bullish market there are several investors who want to invest and papers are in short supply.

In such a situation, perhaps I would find an investor who is willing to pay Rs105 for my debt instrument for which I had paid Rs 100 to the original issuer for earning a 10% interest.

SIGNIFICANCE OF YIELD IN BOND MARKET

In this situation I become the issuer to the new investor who purchased the debt paper from me for Rs 105.

SIGNIFICANCE OF YIELD IN BOND MARKET

The earning of the new investor works out to be

$$\text{Rs } 110 - \text{Rs } 105 = \text{Rs } 5$$

And the amount of interest he earns works out to

$$(\text{Profit/Invested amount}) \times 100 = \{5 / 105\}\% = 4.7\%$$

SIGNIFICANCE OF YIELD IN BOND MARKET

Thus we see that when the market is bullish the yields come down and one is able to raise capital at lower interest rate.

SIGNIFICANCE OF YIELD IN BOND MARKET

**I hope this lesson has succeeded
in clarifying this concept.**

SIGNIFICANCE OF YIELD IN BOND MARKET

I will be glad to receive your feedback on this lesson to understand if there any gaps.

Your feedback will help me improve my lessons going forward. Also if you wish to demystify any other concepts, please write to me about them.
